

STATFOLD
NARROW GAUGE TRUST

'Trangkil No.4' is an 0-4-2 saddle tank engine built by Hunslet of Leeds in 1971. She has a special place in the collection being the last steam locomotive to be built at Hunslet's Jack Lane works. She was built for the Trangkil sugar mill estate on the Indonesian island of Java. She was the first steam loco in the collection. Can you colour her in and keep with in the lines?
